## EMPLOYMENT HISTORY

**[ Cartographer, Carto Studio B.V. ]** February 2012 – present

[ Amsterdam, Netherlands ]

- Full integration in the company; helping other co-workers with their projects and deadlines as well as completing my own projects.
- Started an own project concerning “web maps” as a start-up for a new direction within the company.

**[ Land surveyor, Van Steenis B.V. ] (internship)** 2011

[ Houten, Netherlands ]

- Understanding the basics of land surveying equipment and actively using these skills in the field. Understanding the basics of monitoring and assessing the quality of 3D, 2D and 1D geodetic networks in compliance with the procedures of the "Delft School" of geodesy.
- Gaining experience using with geodetic (surveying) equipment and learning about the necessary procedures.
- Participating in projects lead by co-workers in the field, working with theodolites, total stations, dumpy levels, GPS and 3D-laser scanning equipment.

**[ Cartographer, Carto Studio B.V. ] (internship)** 2010 – 2011

[ Amsterdam, Netherlands ]

- Understanding the basic working within the cartographic field.
- Learning to work with the necessary software programs.
- Participated in projects started by co-workers to understand the work flow.
- Started my own project developing the “Travellers’ Railway Map of Europe” (which has been published and already has a 2nd edition.)
