

Job Description: GIS Consultant

| | |
|-----------------------------|--|
| Experience: | Post graduate qualification in Geographic Information Systems or equivalent workplace experience essential; 1-2 years in relevant employment desirable. |
| Training: | BSc or BA in Geography, Environmental Science, Town and Country Planning or equivalent subject area to reflect understanding of land use planning and management in the UK. |
| Location: | Cheltenham, Gloucestershire. |
| Salary Range: | £17,500 - £22,250 pa Negotiable depending on skills and experience. Full time or part time. |
| About the Company: | An exciting opportunity to join a young, expanding environmental planning practice which provides professional advice to a range of clients in the areas of Sustainability, Strategic Environmental Assessment, Habitats Regulations Assessment, Environmental Impact Assessment, Ecology and Green Infrastructure planning. We are a dynamic, energetic and ethically motivated Company, committed to continuing the professional development of our team. |
| About the Role: | The role presents the opportunity to contribute to a diversity of projects for public and private sector clients within a vibrant team, ranging from national and sub-regional strategies and plans to masterplans and individual planning applications. The ability to manage your own workload and respond well to deadlines will be essential. We are keen to hear from mature-minded and ambitious individuals who have the capability and desire to deliver high quality and innovative mapping solutions using: <ul style="list-style-type: none"> ▪ Geographic Information Systems and related software packages ▪ Geo-spatial analysis and data management ▪ Digitisation and data manipulation This exciting post will include a blend of client-facing and Company-internal roles. |
| About the Candidate: | Candidates will need to be self-motivated, innovative and proactive. You will exhibit a capacity for creative and original thinking in relation to designing GIS analytical techniques to support the development of strategies and reports, in order to influence strategic and site-level initiatives for environmental or sustainability gains. Experience of working in a land use or development planning context will be an advantage, and a strong appreciation of environmental issues is essential. All candidates must possess good interpersonal and written / verbal communication skills. Other essential skills include: <ul style="list-style-type: none"> ▪ Experience of ESRI ArcGIS ▪ Proficient in the use of MS Excel ▪ Appreciation / understanding of cartographic techniques and the design element of map production. Experience in the use of Adobe Illustrator and MAPublisher is desirable. |
