

cartographica

the international journal for geographic information and geovisualization

Cartographica is dedicated to publishing articles on all aspects of cartographic and geovisualization research while maintaining its tradition of publishing material on cartographic thought, the history of cartography, and cartography and society.

Cartographica delivers in-depth research and writing covering a wide range of cartographic studies, including the production, design, use, and cognitive understanding of maps, the history of maps, and geographic information systems. *Cartographica* publishes abstracts in French and English.

Each volume of *Cartographica* comprises four issues: two or three regular issues and one or two special-topic monographs. These special monograph issues, accommodating book-length manuscripts, provide an extensive look at one particular area of cartography.

The regular issues also include strong reviews of reference books and atlases as well as listings of recent cartographic literature from around the world.

Published quarterly by the University of Toronto Press.
ISSN: 0317-7173.

Top Ten Classic *Cartographica* Articles Now Free Online

The top ten most-cited articles in the history of *Cartographica* are now freely available online.

The papers represent a wide range of cartographic interests and include work by many influential writers, such as

1. **J.B. Harley, "Deconstructing the Map,"**
Cartographica 26/2 (1989): –20.
2. **D.M. Mark "Automated Detection of Drainage Networks From Digital Elevation Models,"**
Cartographica 21/2&3 (1984): 168–178.
3. **G. Langran and N.R. Chrisman, "A Framework for Temporal Geographic Information,"**
Cartographica, 25/3 (1988): 1–14.

Visit www.utpjournals.com/carto for the full listing and to explore these free full-text articles.

CARTOGRAPHICA IS NOW ONLINE <http://utpjournals.metapress.com>

Cartographica is now available electronically and includes the complete back file of previously published articles, going back to issue 1.1, when *Cartographica* was known as *The Cartographer*. In addition to the substantial back file and current issues, the *Cartographica* Online site has all the features that users and librarians look for in an electronic resource, including full searching (full text, Boolean, relevancy ranking, and persistent keyword searching), quick searching (single field, single button, automatic recognition of ISSN and DOI), advanced searching (citation text, publication, subjects, or content types), search results (summaries, dimensional navigation, abstracts, citation or tabular results, search within results, filter selected items), parent list navigation, publication metadata, TOC alerting, forward reference linking, and link exports.

For librarians, our system simplifies access management, linking, and usage reporting with powerful yet easy-to-use administration tools. Support for established and emerging standards, such as OpenURL, and COUNTER, enables seamless integration with existing library systems.
